Team Name: Immaculate Inventors

How will decisions be made?
- Biweekly meetings and discussions
- Discord group chat
- Listing positives and negatives of new features.
- Consider implementation time and constraints

What is the process for handling conflict?
- Since we have a team of 5, a majority vote can be held to resolve conflicts

What are the expectations for communication?
- Respond to any questions in the group chat within 36hours
- Let each other know if any commitment or external conflicts interfere with the project's progress
- Message when there is a pull request to be made

What are the metrics for success for each project?
- Keep each other accountable
- Everyone should be up to date, and on the same page
- Bi-Weekly standup meetings
- Allow each other to learn and apply any aspect of the design process along the way
- Be patient and respectful of each other's skill level

What grade implications should be in place if someone doesn't do their part on the project?
- Do not give them credit, take their name off
